Subject: Brian Krichbaum Testimonial

Dear Sir or Madam,

As Chief Technology Officer and President of ASC Incorporated, I worked with Brian Krichbaum on a professional level for more than two years (2001 — 2003). During that time Brian held the positions of Vice President of Operations in charge of ASC's manufacturing plants, and later on as Vice President of Open-Air Systems in charge of ASC's open-air activities.

Brian is of high intelligence and has a strong understanding of the importance of the customer, and thus knows how to translate the customer's needs and requirements into the manufacturability of engineering and design. He has the ability to comprehend complex problems, put them into simplistic form, and push for implementation. Brian's management and technical skills were critical to the successful launches of the Chevrolet SSR and the BMW Z4 programs.

His experiences in Program Management, Engineering and Manufacturing were of great asset to ASC. His behavior towards his superiors and staff was professional to say the least. Throughout our professional relationship I did enjoy working with Brian and do wish him luck for his future.

Although I am now the CEO and President of a large German corporation, I would eagerly welcome the opportunity to work with Brian again, and heartily endorse him.

Should you require a verbal or written feedback, please do not hesitate to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "K. Blicke", written over a white background.
